TACTILE is a leading global manufacturer of stone-coated roofing tile manufacturers.

Using state-of-the-art Korean technology, coupled with high specification Italian raw materials, **TACTILE** aims to deliver world class roofing solutions to all its valued clients.

We are confident that our product is an optimal blend of comfort, safety and quality. With this in mind, we put together the finest designs, with new technologies and years of research & development.

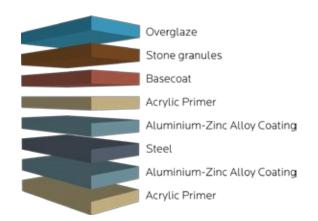

TACTILE redefines roofing solutions.

PRODUCTS

TACTILE uses high quality steel coated with Aluminium and Zinc.

The stone granules used, are fine Italian basalt chips.

The top quality raw materials are put together using advanced Korean technology to produce the **TACTILE** products.
